

# fizikai szemle

The background of the page is a vibrant astronomical image. It features a central, bright, multi-colored core (red, orange, yellow, and white) that appears to be the center of a galaxy or a nebula. This core is surrounded by a complex, multi-colored structure of gas and dust, with prominent blue and green regions. The overall appearance is that of a star-forming region or a galaxy core. The colors are rich and varied, creating a sense of depth and energy.
